**Answer: A**

3. A company has a Palo Alto Networks firewall with a single VSYS that has both locally defined rules as well as shared and device-group rules pushed from Panorama.

In what order are the policies evaluated?

Evaluated 1st

Choose One 

- Shared Pre Rules
- Device Group Pre Rules
- Shared Post Rules
- Firewall Local Rules
- Device Group Post Rules

Evaluated 2nd

Choose One 

- Shared Pre Rules
- Device Group Pre Rules
- Shared Post Rules
- Firewall Local Rules
- Device Group Post Rules

Evaluated 3rd

Choose One 

- Shared Pre Rules
- Device Group Pre Rules
- Shared Post Rules
- Firewall Local Rules
- Device Group Post Rules

Evaluated 4th

Choose One 

- Shared Pre Rules
- Device Group Pre Rules
- Shared Post Rules
- Firewall Local Rules
- Device Group Post Rules

Evaluated 5th

Choose One 

- Shared Pre Rules
- Device Group Pre Rules
- Shared Post Rules
- Firewall Local Rules
- Device Group Post Rules

Answer:

Evaluated 1st    
   
Device Group Pre Rules  
Shared Post Rules  
Firewall Local Rules  
Device Group Post Rules

Evaluated 2nd    
Shared Pre Rules  
   
Shared Post Rules  
Firewall Local Rules  
Device Group Post Rules

Evaluated 3rd    
Shared Pre Rules  
Device Group Pre Rules  
Shared Post Rules  
   
Device Group Post Rules

Evaluated 4th    
Shared Pre Rules  
   
Shared Post Rules  
Firewall Local Rules  
Device Group Post Rules

Evaluated 5th    
Shared Pre Rules  
Device Group Pre Rules  
   
Firewall Local Rules  
Device Group Post Rules

4. A company hosts a publicly-accessible web server behind their Palo Alto Networks firewall, with this configuration information:

Users outside the company are in the "Untrust-L3" zone. The web server physically resides in the "Trust-L3" zone. Web server public IP address: 1.1.1.1

Web server private IP address: 192.168.1.10

Which NAT Policy rule will allow users outside the company to access the web server?

A.

Original Packet								Translated Packet	
Name	Source Zone	Destination Zone	Destination Interface	Source Address	Destination Address	Serv...	Source Translation	Destination Translation	
1 Web_server_Inbound	Trust-L3	Untrust-L3	any	192.168.1.10	any	any	static-ip 1.1.1.1 bi-directional: yes	none	

B.

Original Packet								Translated Packet	
Name	Source Zone	Destination Zone	Destination Interface	Source Address	Destination Address	Serv...	Source Translation	Destination Translation	
1 Web_server_Inbound	Untrust-L3	Trust-L3	any	any	1.1.1.1	any	none	address: 192.168.1.10	

C.

Original Packet								Translated Packet	
Name	Source Zone	Destination Zone	Destination Interface	Source Address	Destination Address	Serv...	Source Translation	Destination Translation	
1 Web_server_Inbound	Untrust-L3	Trust-L3	any	any	192.168.1.10	any	none	address: 1.1.1.1	

D.

Original Packet								Translated Packet	
Name	Source Zone	Destination Zone	Destination Interface	Source Address	Destination Address	Serv...	Source Translation	Destination Translation	
1 Web_server_Inbound	Untrust-L3	Untrust-L3	any	any	192.168.1.10	any	none	address: 1.1.1.1	

- A. Option A
- B. Option B
- C. Option C
- D. Option D

**Answer: B**

5. Wildfire may be used for identifying which of the following types of traffic?

- A. URL content
- B. DHCP
- C. DNS
- D. Viruses

**Answer: D**
